#### **GENERAL FEATURES**

The BT4200 is a small portable current generator of 4-20mA current. It works in active or passive mode, and with its digital display, you can span and adjust your equipment.

#### **MECHANICAL SPECIFICATIONS**

- Black pocket unit
- Supplied with 2 wires 50cm with clamps
- Dimension : L 157mm, W 84mm, H 45mm
- Useful battery location
- 9VDC battery type PP3 included

#### **TECHNICAL SPECIFICATIONS**

- Current generator from 0 to 20mA
- Reverse polarity protection
- Current adjustment by one trimming potentiometer
- Active mode : 28mA generated under 18VDC
- Passive mode : 28mA regulated under 40VDC max
- Power supply : battery 9VDC (type PP3)
- Display : LCD screen low consumption
- Maximum display : 19.99
- Battery lifetime : 250mAh (approximately 4h of maximum active use)
